

ASHAWAY®

Kevlar®

TENNIS STRINGS

[HYBRID TECHNOLOGY]

Ashaway's family of braided Kevlar strings are used to maximize durability in hybrid string combinations

Kevlar® 18

1.10 mm
[18 gauge]

110 metres / 360 feet
SMALL REEL

220 metres / 720 feet
LARGE REEL

MAIN FEATURES

[100% BRAIDED KEVLAR
OPTIMUM BALL CONTROL
SUPERIOR DURABILITY]

THE BENEFITS

1.10 mm braided Kevlar provides a hybrid string combination with excellent control and ability to spin the ball. Kevlar 18 durability is superior to most other hybrid materials

Kevlar® 17

1.25 mm
[17 gauge]

110 metres / 360 feet
SMALL REEL

220 metres / 720 feet
LARGE REEL

MAIN FEATURES

[100% BRAIDED KEVLAR
BALANCED POWER AND CONTROL
OPTIMUM DURABILITY]

THE BENEFITS

1.25 mm braided Kevlar provides a hybrid string combination with an excellent combination of power and control. Kevlar 17 durability is optimum when compared to other hybrid materials.

Kevlar® 16

1.30 mm
[16 gauge]

110 metres / 360 feet
SMALL REEL

220 metres / 720 feet
LARGE REEL

MAIN FEATURES

[100% BRAIDED KEVLAR
EXTREME TOUGHNESS
MAXIMUM DURABILITY]

THE BENEFITS

1.30 mm braided Kevlar provides a hybrid string combination with extreme toughness and string life. Kevlar 16 provides powerful string breakers with maximum durability under all conditions.
