

Crossfire® +Plus

TENNIS STRING

HYBRID TECHNOLOGY

The Crossfire family of tennis strings features a tough, durable braided Aramid main string combined with a Synthetic Gut cross string

MAIN FEATURES

- Powerful Playability
- Softer Feel
- Superior Spin Capability
- Maximum Durability

POWER: CONTROL: CONTR

THE BENEFITS

- PTFE filaments in braided Aramid main string produce softer feel to enhance playability of powerful Aramid filaments
- 1.25 mm braided Aramid / PTFE main strings enhance string abrasion resistance and increase string life
- Synthetic Gut cross strings provide superior resilience and ball control
- Crossfire +Plus hybrid combination maximizes both playability and string life for chronic string breakers
